

DECLARATION OF CONFORMANCE

Union Butterfield Drilling & Tapping Fluid

Union Butterfield, a brand of Precision Twist Drill hereby declares that the above named material(s) is in conformance with the requirements of directive 2002/95/EC of the European Parliament and of the Council on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) regarding lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE).

Sincerely,

A handwritten signature in black ink that reads 'Ian Hainsworth'.

Ian Hainsworth
General Manager
PSU/Crystal Lake

Note:

The European Union RoHS regulation. RoHS is short for "restriction of the use of certain hazardous substances in electrical and electronic equipment". This regulation applies to electrical and electronic equipment manufactured and/or sold in the EU.

This regulation applies only to the components of electrical and electronic equipment. The materials and chemicals used in the manufacture of these components are not covered by this regulation. Therefore, unless one of our products is used as a component in the electrical or electronic equipment, this regulation would not apply.

Union Butterfield Tapping fluid does not indicate that it contains any of the metals spelled out in the RoHS regulation, mercury, lead, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE).
